GeoPro

Field

- Graphical interface available on Windows® and Windows Mobile™ devices
- Collect field measurements
- Control GNSS and robotic systems
- CAD in the field functionality
- Export point files to third party software

CAD functionality

Collect more accurate and thorough field measurements the first time. GeoPro Field lets you see your field measurements on a MAP view individually, or with background map or CAD graphics. You can make better decisions in the field and immediately determine where additional measurements are required.

Export point files almost anywhere

With GeoPro Field you can create an export file format in the form of a point list file that can be imported into any brand of office software. This saves you time and greatly reduces transcription errors compared to traditional data entry from a field book.

GeoPro

FIELD

Welcome to the quickest and easiest way to collect and layout points in the field. GeoPro Field's user friendly interface and simple but powerful controls help you work faster and more precise.

Easy to use interface

This is the simplest, most effective field software you'll find. Easy to read icons on the bright windows touchscreen tablet help you complete your field work faster and with more detail.

Lightening fast field measurements

GeoPro Field quickly collects all measured points with a code descriptor. Field measurement locations appear on the MAP view of the controller so you instantly know how well you measured the scene.
