Disable Windows keyboard

- The Time & Language typing menu is opened.
- Tap the Touch keyboard dropdown.
- Tap the Show the touch keyboard dropdown, set to never.
- Tap the X to exit the menu and return to Topcon Field.
- The Windows keyboard is now disabled.
- Changing this setting will also require a change to the Windows settings to easily open the Windows keyboard in other applications or using a search engine such as Google.

Update Windows system keyboard

- Exit Topcon Field.
- Tap and hold any where in the task bar.
- The Personalization Taskbar menu is opened.

Show Touch Keyboard in taskbar

Under System Tray icons.

- Tap the Touch Keyboard Show touch keyboard icon drop down.
- 1. Set to Always.
- 2. Tap the keyboard icon in the Taskbar and confirm the keyboard opens.
